

CERTIFICATE

This certificate is awarded to

NAME from TEAM

for your participation in the 2014 MOONBOTS Challenge.

The whole team behind the MOONBOTS Challenge, the Google Lunar XPRIZE team and all partners thank you for your participation and engagement in the 2014 challenge which has inspired and will continue to inspire thousands of other young people to learn more about space exploration and to pursue science, technology, engineering, arts and mathematics.

The MOONBOTS team

The 2014 MOONBOTS Challenge ran from March to August, and attracted over 300 teams from 24 countries who entered Phase One by submitting a video entry about 'Why We Should go back to the Moon'. Teams are comprised of 2-5 members (ages 8-17) and one team captain at least 18 years old. A panel of judges selected 25 teams to qualify for Phase Two, each of which was provided with a LEGO® MINDSTORMS® EV3 robotics kit to build and program a unique simulated robotic mission based on their own designed Game Play and Mission. In addition, they were asked provide a demonstration to the judges via live webcast and contribute to STEM education by sharing their innovation with children and adults in their community.

Since 2010, MOONBOTS has challenged thousands of young people from around the world. In addition to XPRIZE and Google, competition partners include *FIRST*® LEGO® League, PISCES, MATRIX Robotics, Rotacaster, 3D Robotics, HiTechnic, and GeekDad
