

MOONBOTS

CERTIFICATE

This certificate is awarded to

NAME from TEAM

for your participation in the 2015 MOONBOTS Challenge.

The whole team behind the MOONBOTS Challenge, the Google Lunar XPRIZE team and all partners thank you for your participation and engagement in the 2015 challenge which has inspired and will continue to inspire thousands of other young people to learn more about space exploration and to pursue science, technology, engineering, arts and mathematics.

The MOONBOTS team

The 2015 MOONBOTS Challenge began in April, and attracted 235 teams from 29 countries who entered Phase One by submitting a written or video entry about what inspires them about the Moon. Teams are comprised of 2-4 members (ages 8-17) and one team captain at least 18 years old. A panel of judges selected 30 teams to qualify for Phase Two, each of which was provided one of three platform systems (LEGO® MINDSTORMS® EV3, VEX IQ, MECCANO Meccanoid G15KS) to build and program a unique simulated robotic mission based on the moon tale they submitted in Phase One. In addition, they were asked provide a demonstration to the judges via live webcast and contribute to STEM education by sharing their innovation with children and adults in their community.

Since 2010, MOONBOTS has challenged thousands of young people from around the world. In addition to XPRIZE and Google, competition partners include *FIRST*® LEGO® League, Cogmation Robotics, VEX Robotics Inc., Spin-Master Ltd., the Robotics Education and Competition Foundation (RECF), GeekDad, GeekMom, Robomatter Incorporated and Dexter Industries.
